

## Case Study - Bloomingdale Bank

CONTRACT - Once a product is manufactured by MOBILIA, designers, dealers and end users can be confident that the line will never be “dropped”. MOBILIA will continue to make any line for as long as necessary. MOBILIA will also develop a custom line for any user, and that line will always be available. Below is an example of an end user that modified one of MOBILIA’s standard lines (Quattro) and has since used it in every location. There are no constraints on the design of these “Contract” lines. Custom sizes, material, stain, etc. are all part of the equation
